

Mieczysław Muraszkiwicz

Professor, Warsaw University of Technology, Poland

Mieczysław Muraszkiwicz is a professor of computer and information science at the Institute of Computer Science (Warsaw University of Technology) and a Vice Director of Institute of Computer Science of the Warsaw University Technology in charge of research. He is also a co-founder of the private Institute for Computer Information and Engineering, www.icie.com.pl.

His main research has been focused on network information systems (including semantic web), knowledge representation and management, big data, data mining and cognitive networks, and cloud computing; he is also interested in matters of future and emerging technologies, network society and relationships between technology and culture. He has to his record over 120 publications that have been published or presented in international journals and/or conference proceedings, and 3 books. He was a supervisor of 16 Ph.Ds in the field of computer and information science.

Prof. M. Muraszkiwicz has been a leader or member of over 55 information and communications technology projects for UNIDO, FAO, UNEP, UNESCO, World Bank, and for Austrian, Dutch, German, Polish, and Swedish companies and organizations in the field of telecommunications, business, industry, management, administration, education, culture, and librarianship, taking place in 45 countries. He was an evaluator of FP6 and FP7 projects for the EC in the area of ICT applications for risk management and environment. He is a General Assembly member of the MOST Programme (Mobile Open Society through wireless Technology), www.most-program.org; Chairman of the Polish e-Mobility Platform; former board member of the European e-Mobility Platform; Polish Representative to the Domain Committee (Information and Communication Technology) of the European Cooperation in the field of Scientific and Technical Research (COST); a Fellow of Hitachi European Science and Technology Forum.
